

DENTISTS

LEARN HOW TO RETIRE 5-15+ YEARS EARLIER!

FEATURED AT THE AZ ACADEMY OF GENERAL DENTISTRY ANNUAL CONVENTION

DENTISTRY IS NOT AS MUCH FUN AS IT WAS 25 YEARS AGO:

- Higher student Debt
- Much lower payment for your medical services from insurance companies
- Up to 24% of dentists are forced to retire early due to disability

How to Retire Early & Happy?

1. SAVE TAXES! You'll have \$2,471,146 more if you can save \$50,000/year in taxes for 20 years and earn an average 8%

2. AVOID WALL STREET RISK! There have been 2 major stock market crashes this century and each time the market dropped by over 50%. You can't afford to retire if you lose 25-50% of your life savings.

3. MAXIMIZE YOUR RETIREMENT INCOME! The average S&P 500 compounded ROI has been only 2.85% from 1/1/2000 to 12/31/2018. Even if you add dividends but subtract normal Wall Street fees, you can't build wealth fast.

EXAMPLE: If you invest \$500,000 today, your choices are: 1% in the bank; 3% in a 10-year Treasury bond; or 2% average dividends in the S&P 500 stocks (average for the last 20 years). Your annual income would be: \$5,000, \$15,000, or \$10,000. In contrast, your annual income could be \$50,000 - \$129,000+ by investing in a private pension, real estate, or equipment leasing, if you wait 10 years.
